Cat's Best

Premium Cat Litter

Cat's Best Cat Litter is a premium organic clumping cat litter made from plant fibres. It has superior odour binding capabilities and yet is completely natural & biodegradable. Available in three types – Original, Smart Pellets and Sensitive.

Cat's Best Original is a soft wood granulate that absorbs up to 700% of its volume. Because it is horizontally clumping, the soiled litter can be easily removed from the top of the litter, meaning the base contents can last up to 7 weeks!

Order Code	Product
07.18	Cat's Best Original 5L (2.1kg)
07.18a	Cat's Best Original 10L (4.3kg)
07.18b	Cat's Best Original 20L (8.6kg)
07.18c	Cat's Best Original 30L (13kg)

Cat's Best Smart Pellets is the same premium litter in a pellet form. Perfect for long haired cats so it doesn't stick to their fur.

Order Code	Product
07.21a	Cat's Best Smart Pellets 5L (2.5kg)
07.21b	Cat's Best Smart Pellets 10L (5kg)
07.21c	Cat's Best Smart Pellets 20L (10kg)

Cat's Best SENSITIVE is an ultra fine granulate, that makes it tighter clumping and super soft on fussy paws. Absorbs up to 800% of its volume!

Order Code	Product
07.25a	Cat's Best Sensitive 8L (2.9kg)
07.25b	Cat's Best Sensitive 20L (7.2kg)

Chipsi

Litters & Substrate

Pets Dream Universal is a universal hygienic wood pellet substrate/litter for rodents, cats & birds. It is super absorbent and efficiently binds odours without the use of chemical additives. Produced from fir and spruce timber, making it 100% biodegradable.

Order Code	Product
07.24a	Pets Dream Universal 7L (4kg)
07.24b	Pets Dream Universal 15kg

Chipsi Ultra is produced from untreated softwoods with 100% natural fibres and NO chemical additives. Dust free and anti-microbial. **Chipsi Ultra** is a small granule with an irregular surface designed to absorb liquid ultra fast and make it highly effective in reducing odour. Suitable for use with small animals such as rats, mice, guinea pigs and rabbits.

Order Code	Product
07.23a	Chipsi Ultra 10L (4.3kg)
07.23b	Chipsi Ultra 20L (8.6kg)

Chipsi

iPet2
innovative products for pets

Litters & Substrate

Chipsi pet bedding is a refreshingly different natural organic fibre bedding that is hygienic, super absorbent, odour binding and dust-free with anti-microbial properties. Chipsi shavings are manufactured from renewable forests of spruce and fir (not pine)! Suitable for rodents and a variety of other small animals. Highly compressed and will greatly expand when fluffed out from the pack. Available in Classic, Citrus & Green Apple.

Chipsi FUN combines the Classic Chipsi softwood shavings with colourful and playful Carefresh flakes.

Order Code	Product
07.11a	Chipsi Classic 1kg
07.11b	Chipsi Classic 3.2kg
07.11c	Chipsi Classic 12.5kg
07.12a	Chipsi Citrus 1kg
07.12b	Chipsi Citrus 3.2kg
07.13a	Chipsi Green Apple 1kg
07.13b	Chipsi Green Apple 3.2kg
07.19a	Chipsi Strawberry 1kg
07.22a	Chipsi FUN 4kg

LITTER & SUBSTRATES

Chipsi/Pets Dream

Reptile Substrate

Pet's Dream Snake is produced from untreated softwoods with 100% natural fibres and NO chemical additives. Dust free, anti microbial and free of germs with NO parasites, it has a pleasant fresh aroma without the use of strong essential oils. This product aids in your animal's natural nesting instinct as it is particularly soft and therefore ideal for snakes to bury themselves into.

Order Code	Product
07.16a	Pet's Dream Snake 2kg
07.16c	Pet's Dream Snake 8kg

Chipsi Extra is a Beechwood granulate suitable for reptiles, birds such as parrots and some other smaller mammals. It is hygienic, dust free, easy to clean and natural (no additives). Available in two chip sizes – Med (chip size ~3x5mm) & XXL (chip size ~5x10mm)

Order Code	Product
07.14a	Chipsi Extra XXL 10L
07.14b	Chipsi Extra XXL (15kg)
07.15a	Chipsi Extra Medium 10L
07.15b	Chipsi Extra Medium (15kg)

Carefresh

Pet Bedding

Carefresh Pet bedding is made from natural reclaimed paper fibres. It is 3 x more absorbent than regular wood shavings. It is virtually dust-free so it's safer for you and your pet. Plus, it will suppress ammonia odours for up to 10 days, leaving your pet's enclosure smelling better for longer. Carefresh pet bedding is not only odour-binding, soft and snuggly – it is also 100% biodegradable and compostable making it the smart pet bedding choice. Carefresh is available in natural and coloured varieties.

make it home
small pet bedding

return the love by providing the very best care.

FLUFFY SOFTNESS

carefresh[®] provides the most comfortable home since it's made from scratch, especially for small pets.

10 DAY ODOR CONTROL

Reptile Substrates

URS **Desert Red** Sand is natural fine sand that is the ideal substrate for many reptiles. Suitable for desert dwelling dragons, monitors and geckoes. When dampened, provides an excellent laying site for reptiles that bury their eggs.

Order Code	Product
07.07	URS Desert Red Sand 20kg
07.08	URS Desert Red Sand 10kg

Ultimate Bush Flooring is an all natural, aged bark substrate that has been washed and sanitized, creating a clean and natural flooring for your reptile.

Order Code	Product
07.05a	Ultimate Bush Flooring 1.2kg

URS **Frog Rocks** are large polished pebbles that are great for use with frogs, turtles, etc. Stone size is approximately 5-6cm, preventing accidental ingestion (small rocks/stones can be harmful if swallowed). 6kg bags available in Black, White and Mixed colours.

Order Code	Product
07.09a	Frog Rocks Black – 6kg
07.09b	Frog Rocks White – 6kg
07.09c	Frog Rocks Mixed – 6kg

Animal Wellbeing

Aquarium Water Treatments

**AVAILABLE
SOON!**

Australian Made NEW range of Aquarium & Pond water treatments

Animal Wellbeing's Pure Water Conditioner is an essential solution for maintaining a healthy aquatic environment. Effectively eliminates harmful chlorine and chloramines and the live bacteria in the conditioner facilitate the conversion of toxic ammonia into harmless free nitrogen. Additionally removes unwanted heavy metals that can pose risks to fish health, making it a vital addition to any aquarium setup.

Animal Wellbeing's Growth Plant Fertiliser delivers a balanced blend of micro and macro nutrients designed specifically for aquatic plants. This premium formula ensures optimal plant health by supplying essential nutrients like nitrogen, phosphorus, potassium, and trace minerals, which are crucial for vibrant growth and robust root systems. The fertiliser promotes efficient nutrient absorption, enhancing photosynthesis and overall plant vitality.

Animal Wellbeing's Nutrient is a comprehensive formula designed to enhance the health and growth of aquatic ecosystems. This solution is rich in essential amino acids and vitamins, crucial for protein synthesis in plants, fish and invertebrates. By promoting cellular growth and photosynthesis, Nutrient accelerates the uptake of vital nutrients, ensuring the robust development of aquatic plants. Additionally, amino acids effectively reduce stress in aquatic life while strengthening cell walls.

Animal Wellbeing's Carbon is an essential carbon dioxide source designed to enhance the bioavailability of organic carbon in your aquarium's water column. This product supports aquatic plant growth by facilitating efficient photosynthesis through optimal light and nutrient utilisation. By addressing carbon dioxide deficiencies, Carbon prevents stunted plant growth and nutrient uptake while mitigating long-term algae problems that can arise from nutrient competition. Regular testing of carbon dioxide levels is crucial for maintaining a thriving aquatic environment.

AQUARIUM & FISH RANGE

Animal Wellbeing

Aquarium Water Treatments

**AVAILABLE
SOON!**

Australian Made NEW range of Aquarium & Pond water treatments

Animal Wellbeing's Start is a powerful concentrated solution designed to enhance the health of your aquarium by introducing beneficial bacteria strains. This product effectively colonises various surfaces such as rock, wood, and substrate, converting toxic ammonia and nitrite into less harmful nitrate. Ideal for new and established aquariums, Start accelerates the cycling process and replenishes essential bacteria populations, ensuring a stable and thriving aquatic environment.

Animal Wellbeing's Stable provides a concentrated blend of live nitrifying and denitrifying bacteria strains. Effectively converts toxic ammonia and nitrite into less harmful nitrate, while reducing nitrates and phosphates. By establishing and maintaining the population of beneficial bacteria, Stable ensures nutrient stability, essential for the well-being of aquatic life. Helps prevent ammonia spikes that can cause severe harm to fish and potential mortality, making it an indispensable addition to any aquarium care regimen.

Animal Wellbeing's Blackwater extract contains organic fulvic and humic acids, helping to reduce the concentration of calcium, magnesium, sodium, and other cation elements in the water column, creating a natural blackwater environment ideal for fish and plants that thrive in softwater environments. Additionally, it helps reduce the water's pH, making it more suitable for these species. Blackwater extract has antifungal, parasitic, and bacterial properties. It also enhances fish health, colouration and encourages natural breeding behaviours by providing the optimum environment. Blackwater extract is safe to use with shrimp. Shrimp can be sensitive to pH changes, so a slow acclimation is recommended.

Animal Wellbeing's Aquarium Blackbeard Remover fights against Blackbeard algae (BBA) found in freshwater aquariums. It is characterised by its dark green, grey, or black hues. If not managed quickly, this algae can spread rapidly, often due to low carbon dioxide levels that hinder plant growth and create favourable conditions for BBA.

AQUARIUM & FISH RANGE

Animal Wellbeing

Pond Water Treatments

AVAILABLE SOON!

Australian Made NEW range of Aquarium & Pond water treatments

Animal Wellbeing's Pond Pure Water Conditioner is an essential solution for maintaining a healthy aquatic environment. Effectively eliminates harmful chlorine and chloramines, ensuring that fish thrive in clean water. The live bacteria facilitate the conversion of toxic ammonia into harmless free nitrogen. Pond Pure Water Conditioner removes unwanted heavy metals that can pose risks to fish health, making it a vital addition to any aquarium setup.

Animal Wellbeing's Pond Grow Plant Fertiliser is formulated to provide a comprehensive mix of micro and macro nutrients tailored for aquatic plants in ponds. This premium fertiliser contains essential elements such as nitrogen, phosphorus, potassium, and trace minerals, which are vital for promoting healthy growth and strong root development. By facilitating efficient nutrient absorption, it enhances photosynthesis and overall plant vitality, preventing issues such as tissue necrosis that can arise from nutrient deficiencies.

Animal Wellbeing's Pond Start is a powerful concentrated solution designed to enhance the health of your pond by introducing specifically selected beneficial bacteria strains. Effectively colonises various surfaces such as rock, wood, and substrate, converting toxic ammonia and nitrite into less harmful nitrate. Ideal for new and established aquariums, Pond Start accelerates the cycling process and replenishes essential bacteria populations, ensuring a stable and thriving aquatic environment. Maintaining a healthy bacteria population is vital for overall pond health.

Animal Wellbeing's Pond Clarifier is a powerful concentrate designed to enhance the health of your pond by providing a blend of live nitrifying and denitrifying bacteria strains. Effectively converts toxic ammonia and nitrite into less harmful nitrate while reducing nitrates and phosphates through the action of the denitrifying bacteria. Establishing and maintaining the population of beneficial bacteria ensures nutrient stability, which is essential for the wellbeing of aquatic life.

AQUARIUM & FISH RANGE

Aquarium Water Treatments

PETS Aquarium products. Well-known, trusted brand

PETS Water Ager. Neutralises harmful chlorines and chloramines from tap water in minutes which makes it safe to use in the aquarium. Dose at 5ml per 20L of tap water. Available in 100ml and 500ml, both with dosing cap included.

PETS Aquarium Clearwater. Suitable for use in cold or tropical freshwater aquariums. This is a flocculent that traps small, water borne particles by attracting them together and causing them to sink. Available in 100ml or 500ml

PETS Aquarium Algae Killer. Controls most algae and green water common in freshwater aquariums. It will kill growing algae and can also be used as a preventative against it occurring. Available in 100 or 500ml.

PETS Aquarium Multicure. Suitable for use in cold or tropical freshwater aquariums. This is a wide spectrum medication formulated for the treatment of common diseases such as White Spot, Fungal diseases, Fin and Tail rot and Velvet Diseases (Oodinium spp.). Available in 100ml or 500ml

PETS Aquarium White Spot Cure. Suitable for use in cold or tropical freshwater aquariums. The protozoa Ichthyophthirius multifiliis causes small white pinhead sized spots on the body and fins of fish. It can be fatal so treat sick fish immediately. White spot is contagious and often introduced into the aquarium by new fish or plants, etc. Available in 100ml or 500ml

Reptile Hide Rocks

By nature, many species of reptiles kept in captivity are shy or nocturnal (or both) and so it's important to offer a sanctuary for them to feel safe and secure while sleeping or seeking privacy. There are a range of **hide rocks** in varied sizes and natural designs to fit this purpose while at the same time blending into the enclosure.

Reptile Water Bowls

Billabong Water Bowls hold a good volume of water and are heavy enough to resist tipping. But these bowls are not only functional, they are also naturally designed in a choice of three earthy colours. This makes them easy to match into the theme you want to create. Available in regular style in four sizes or a corner design in three sizes plus matching flat feed dishes.

09.15

Turtle **Neutraliser** and **Antifungal** blocks. Assists in keeping shells hard and turtles healthy.

F10

Cleaning & Treatments

F10Sc is a total spectrum disinfectant that, unlike other strong disinfectants on the market, has no adverse side effects on people, animals, or on equipment and surfaces. It is ecologically friendly and biodegradable and carries a wide range of registrations and approvals from around the world. In Australia, F10Sc is registered by the APMVA for use in animal production and housing facilities and is approved by AQIS for use in food export processing as a non-rinse disinfectant.

F10 Hand Gel. The combination of F10Sc disinfectant and alcohol results in a quick-drying, waterless skin decontaminant that has a broad spectrum performance against bacteria, fungi and viruses in only 15-30 seconds. Gentle on hands.

F10 Germicidal Barrier Ointment is effective in dogs, cats and horses against bacteria, fungi and viruses. Use this product to treat open and contaminated wounds and prevent re-infection.

F10 Germicidal Shampoo is a safe and highly effective product that is registered for use in dogs, cats and horses as a skin treatment against bacteria and fungi. It also is used to prevent re-infection of these conditions. It is an excellent product for treating common conditions such as ringworm, Staph bacterial infections and “hot spots” as well as yeast infections. It is also unique in the fact that, because it is based on F10SC Disinfectant core actives, it is also effective at removing Canine Parvovirus particles from dog skin and coat post-recovery.

URS & MAC

Cleaners & Mite Spray

Keeping cages clean and pest free is easy with this range of products.

Ultimate Hand Gel is an instant skin sanitiser which kills 99.9% of germs and bacteria on contact. Stops the spread of disease to and from animals caused by human contact. Air dries naturally.

Ultimate Cage Cleaner is specially formulated using biodegradable detergent and a powerful anti-bacterial agent. Can be safely used in vivariums, terrariums and other small animal enclosures.

MAC Mite Spray is a pure safe aerosol insecticide. It contains d-phenothrin that is rapidly biodegradable and not stored in the body tissue when exposed to it. APMVA approved.

Heating Globes

Coloured heating globes for varied application.

The URS Incandescent globes come in a range of colours and wattages.

- **Infrared Spot lamps** can be used for day and night heating. The inner reflective surface focuses heat downwards for a hotter basking area underneath.

- **Oz Purple heat globes** can be used for day and night heating. Simulating natural moonlight for viewing nocturnal animal behaviour.

- **Basking spot globes** produce a white light and can only be used for daytime heating. Has a reflective inner surface to create an intense heated area beneath.

- **Radiant globes** are Far Infrared (FIR) heat globes that are very efficient heating globes. The heat produced is more natural and is similar to the feeling you get from the warmth you feel from sun rays.

iPetz Code	Product Description
04.17a	Infrared spot lamp 40w
04.17b	Infrared spot lamp 60w

04.43	OZ Black Ceramic Globe 250w

Microclimate

Thermostats

Recommended for use with heat sources to safely control temperature in a closed environment. **Microclimate** is a UK Brand that features a number of different thermostat types (on/off, Dimming & Pulsing). All fully wired with a flexible probe.

Ministat 600s are on/off thermostats. Controls up to 600w of any heat source. 0-35°C

B1 Thermostats control heat by dimming the power source. Regulate up to 600w of any heat source. 0-35°C.

NEW Microclimate EVO Connected Thermostats.

Monitor and control your thermostat from anywhere using the Evo connected mobile app or the web dashboard. All you need is a wifi connection to the thermostat. This thermostat is cloud connected with two channels in the connected II and three channels in the Connected III model.

The first Channel can be selected as either dimming or pulse while the other Channel(s) are On Off. Each channel has its own IP rated sensor which can be used to monitor temperature even if the channel is being used to control lighting. This has the added advantage of allowing you to check the temperature gradient in an enclosure if the main probe is located at the heated end. Retains settings if there is a power outage and if connected to the internet will re-establish the time once the internet reconnects. 1200w Combined Max Load (600 max per channel)

B2 & B2/HT Thermostats

control heat by pulsing. Regulate up to 600w of any heat source. 0-35°C (B2/HT 0-45°C)

Ultra Fast Fuse Pack

Reptile Enclosures - Small

02.01

iPetz Code	Product Description
02.01	URS Beastie Box 295x190x140mm

The URS Beastie Box is ideal for temporarily keeping juvenile reptiles of many species. They can be used either by placing holding containers, stacked centrally, in a reptile enclosure or in a rack system with half of the container on a heat mat or heat cord. URS Beastie Boxes are not reptile vivariums; we do not recommend them for long-term use.

There are a variety of smaller glass **URS Enclosures** that have been designed for housing smaller reptiles, amphibians, arachnids and insects.

URS

iPet2
innovative products for pets

Reptile Enclosures - GLASS

URS glass sliding door terrariums

Why are URS Terrariums so good?
Because the URS brand is produced for Reptile lovers, by Reptile lovers. Everyone who owns a reptile knows—it becomes an obsession. So do yourself and your Reptiles a favour and do it right the first time.

Pre-pressed circles, easily removed for adding light fittings

Clip on/lock in lids with space to pass heating/thermostat cables through

Glass Panelled Lid - Reduces heat loss (lowering running costs)

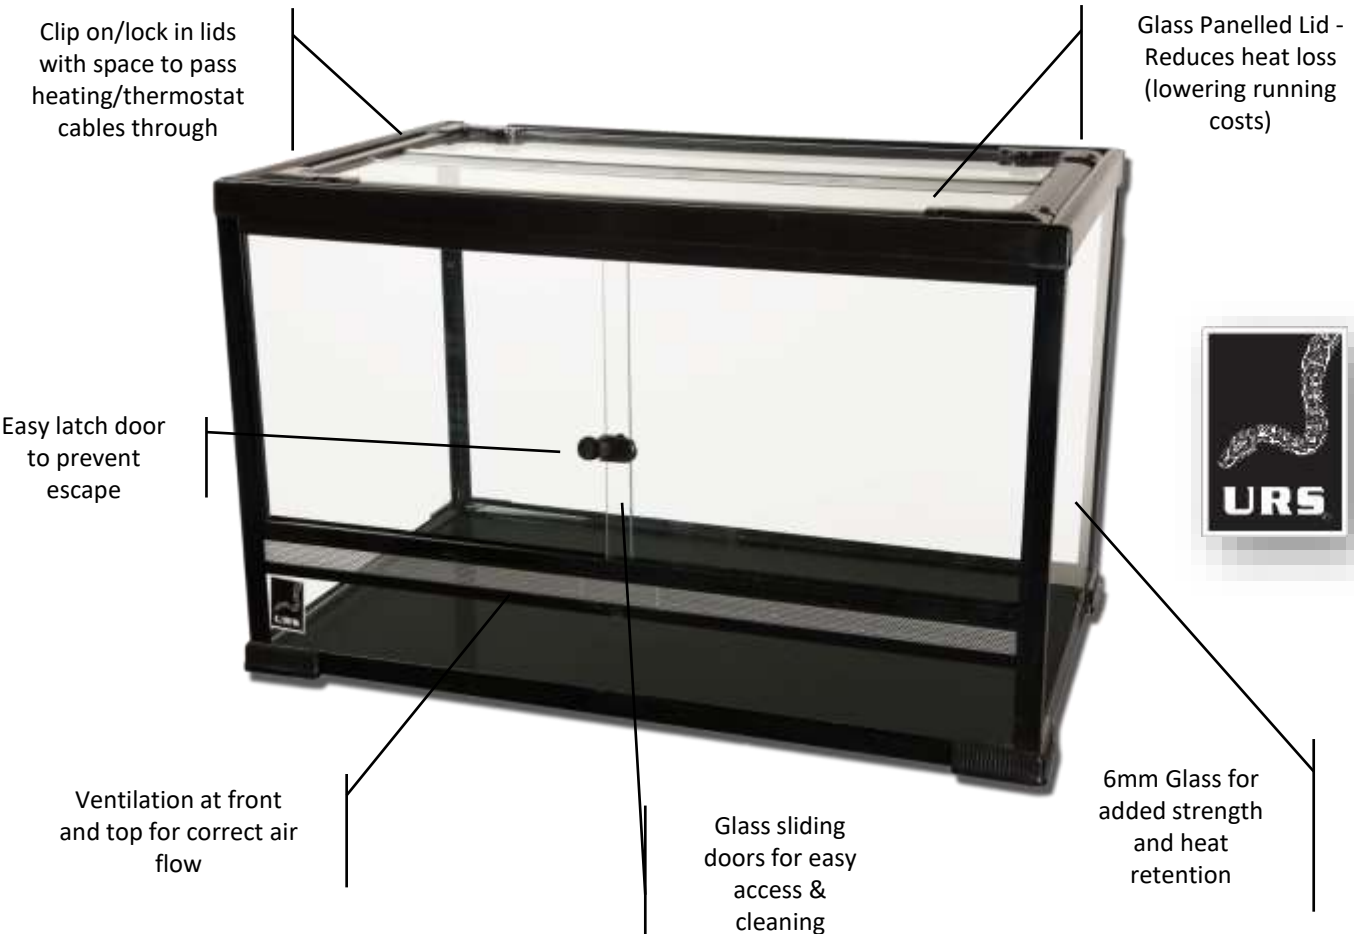

Easy latch door to prevent escape

Ventilation at front and top for correct air flow

Glass sliding doors for easy access & cleaning

6mm Glass for added strength and heat retention

To avoid escape, fit a URS Glass lock to sliding door enclosures.

Reptile Enclosures – TURTLE TANKS

URS Turtle tanks have a NEW DESIGN with the platform on the outer edges of the tank. This allows more free space in the center of the tank. The platform steps down giving the turtle ample room to climb up onto a sturdy dry section to rest. The lid of the turtle tank locks securely in place, with cleverly designed cable spaces to allow cords to pass through for internal filters and water heaters. The lid is predominantly glass with a central mesh band for ventilation. There are two pressed section in the mesh that can be easily drilled out to fit light fittings to allow for internal lighting.

More Information

Livestock

As an additional service for stores that range iPetz products and hold a current commercial licence, we can also supply live reptiles. If you have a licence to sell reptiles and would like to be added to our livestock update email service, type the following link into your browser: www.ipetz.com.au/reptiles.html
Please note – Livestock is limited and seasonal.
